

# Grano Dust

Technical data sheet

**Heidelberg Materials Grano Dust is a 4mm granitic material conforming to the requirements of BS EN 12620.**

When mixed with sand and cement it produces a mortar ideally suited for floor screeds, monolithic and granolithic.

## Pack size

Available as Maxipack and Bulk bags

## Suggested mix design

The below are only suggested mix designs. The user should carry out trials and adapt designs to their own needs.

	Heavy Duty 12mm Depth	Heavy Duty 20-34mm Depth
Cement	50kg	50kg
Dried Sharp Sand	88kg	-
3mm Sand	-	150kg
Grano Dust	88kg	50kg

## Recommendations

Do not use when the air temperature is below 5°C or when the ground is frozen.

Wet mortar should be protected from drying out too rapidly. Cover placed material with plastic sheet or wet hessian.

Allow mortar to dry sufficiently (time dependent on ambient conditions) prior to proceeding with further work.
