

Kiln Dried Sand

Technical data sheet

Heidelberg Materials kiln dried sand is specifically produced for brushing in between the joints of block paving to prevent lateral movement of the blocks.

A dry, lime-free washed silica sand, which contains approximately 95% silica. The typical grain size is ≤ 1.0 mm.

Pack size

Available in Maxipack and Bulk bags

Health and safety

As with all naturally-occurring silica sands, small amounts of respirable silica may be present. If inhaled in excessive quantities over extended periods, respirable silica can constitute a long-term health hazard. Refer to full Material Safety Data Sheet for further information. For cementitious mixes, follow health and safety advice detailed for cement.
