

Sharp Sand

Technical data sheet

Heidelberg Materials sharp sand is the ideal solution for screed, renders, concrete and block paving.

A washed sand conforming to BS EN 13139 Aggregates for mortar. The typical moisture content is 5%.

Pack size

Available in Maxipack and Bulk bags

Mix Design

For detailed advice on concrete mixes and their constituent materials please consult BS 8500 Parts 1 and 2. For general guidance refer to www.packedproducts.heidelbergmaterials.co.uk/en/products/sands/sharp-sand

Health and safety

As with all naturally-occurring silica sands, small amounts of respirable silica may be present. If inhaled in excessive quantities over extended periods, respirable silica can constitute a long-term health hazard. Refer to full Material Safety Data Sheet for further information. For cementitious mixes, follow health and safety advice detailed for cement.
