

WORKING IN PARTNERSHIP

NEW LOW CARBON CEMENT

Keyline exclusive

From March 2019, our new Low Carbon Cement will be available to selected Keyline stores:

Contains Regen[®] GGBS to reduce CO₂ by up to 50% when used in concrete

- Concrete will have increased durability – especially in aggressive environments
- Resists sulfates – suitable for below-ground work
- Produces lighter-coloured concrete – near-white

Hanson will donate 2p to Keyline's charity partner for each bag sold. Keyline will match this contribution.

PROUD SUPPORTER

“We are delighted to be attending the 2019 Keyline Conference, showing you our expertise in dealing with major projects as well as the breadth of our range, including the new Low Carbon Cement that will soon be available to a selection of your branches. Keyline is a major area of focus for us – we’re providing support to your branches via a team of National Account Managers and our Field Sales Team. For day-to-day queries, please see page four for the key contacts within our team.”
